

# Training Catalogue

**Dear Friend,**

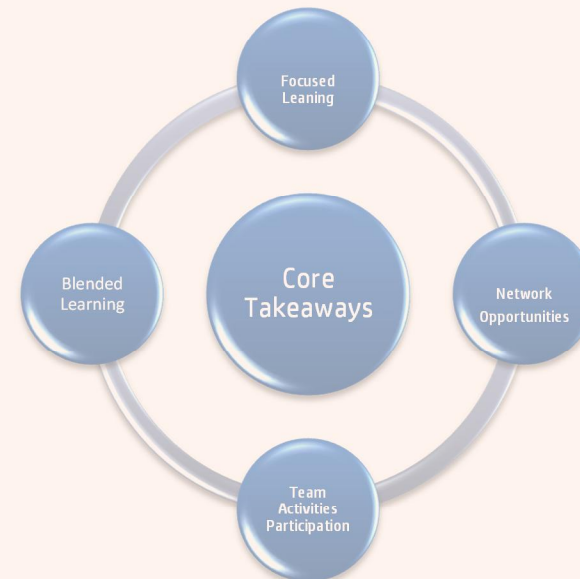

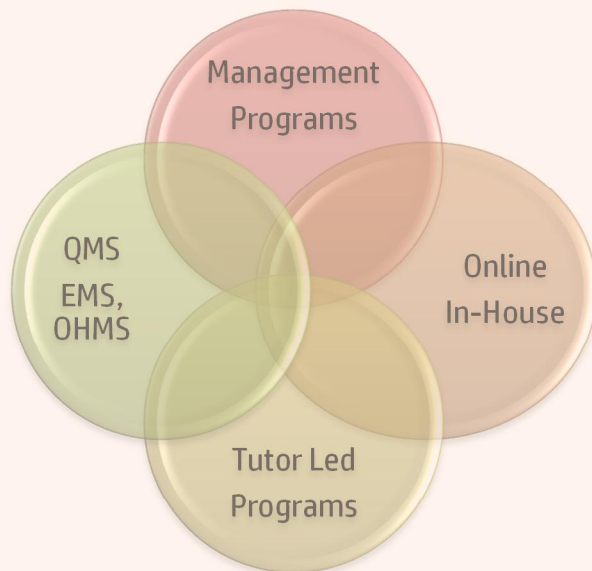

In this document we provide you with the tutor-led schedule of SOAFU Masterclasses programs. Please note that all the programs are offered locally in Nigeria, though at different locations. We encourage you to review the courses carefully and find the ideal training for your personal or corporate development and make a reservation. You will be joining many other attendees from various business sectors in a rewarding learning experience that will impact positively on your career.

In reviewing our catalogue you will notice that we offer certification courses from our training partners PECB Canada and EDULLENCE India, all hosted by us, to ensure that you achieve that highly regarded industrial training and certification you desire. Also we ensure that we provide you with time tested "industry foundation programs" (Lean Management Principles, Six Sigma Applications, ISO Standards, Technology, Planning & Industry Strategic Management programs), also the regular loss control and risk management trainings to meet everyday industry sustenance. As well, an exciting and timely new program entitled "Business Processes Modelling & Change Management", which explores rapidly changing business strategies due to the global economic dynamics.

Jack Welch once said 'Lean and Six Sigma Programs are the best trainings we've ever had, it's better than attending the Harvard Business School'. SOAFU holds this statement strongly and is determined to help groom you with its core tenets for a prosperous career and future. I can assure you that you will be highly impressed not only with the quality of instruction, the timely content and the network opportunities that abounds during our programs; you will also have the opportunity to experience our endless hospitality and the cordial ambience that we readily offer. "You can never go back the same"

We look forward to welcoming you personally to one or more of our training programs.
